

Bell ATM

A simple way to get the most from your network

At Bell, we understand how important it is to simplify your network operations. Without compromising on performance or losing the ability to adapt to future innovation. That's what **Bell ATM (Asynchronous Transfer Mode)** is all about. Proven high performance multimedia networking that allows you to effortlessly merge and control your extensive communications traffic.

With Bell ATM, you can benefit from consolidated voice, data, image and video traffic. An advantage that reduces infrastructure costs and achieves more efficient bandwidth use. By merging your enterprise-wide connections into one high-speed private network, your data security and availability for large data file transfers are ensured. And your connectivity is seamless.

Bell's ATM solution can accommodate changes in your business. Scalable to speeds of up to 155 Mbps and to any network size, you benefit from flexibility that can adapt to your future application requirements and grow with your business. And with full reach across Canada, you benefit from Bell's solid national backbone fibre network.

Choose Bell ATM for easy, customized service

Bell makes ATM service easy. With choices of access speed, options for service level and dynamic bandwidth, you can stay in control of your network and at the same time make it more simple, efficient and cost effective.

Bell's ATM features make it possible for you to enhance productivity and reduce operating expenses while enjoying core network stability that easily accommodates mission critical information and evolutions in services and technology.

Bell ATM features

Suite of Access Speeds allow you to choose from DS1, DS3 or OC3 so you can tailor your solution to meet your business requirements.

Quality of Service provides the best service in the industry for broadcast quality video and toll quality voice, and supports multiple applications by prioritizing traffic according to type of data.

Consolidation of Voice, Data and Video eases network management, and as all applications can reside on one network, you'll enjoy lower costs than with multiple network services.

Bell ATM simplifies your network management

It's easy to do business with Bell. We make it simple by offering a one-year or three-year contract with speed and service options. Most of the ATM features are free of charge with the service. Bell ATM gives you the ability to inter-work various protocols and enables communication between devices of different speeds. With Bell, your connectivity is supported by the most extensive, 100% digital, high-capacity, optical network in Canada. Our superior network performance, backed by 3,000 network engineers, technicians and support professionals, protects and enhances your critical business functions while giving you maximum reliability and uptime. As a total solution provider, we provide you with a dedicated private line to ensure security, and round-the-clock monitoring so we're there when you need us.

The ability to control your communications traffic. With efficiency. While simplifying. That's simply good business.
