

Bell Frame Relay

A simple way to link your locations

At Bell, we understand how important it is to simplify communications between offices. To link multiple sites and maintain high bandwidth traffic patterns, without spending all your profits. That's what **Bell Frame Relay** is all about. A high-speed solution for transferring data, with all the benefits of a private data network, at less cost.

With Bell Frame Relay, you benefit from enhanced network dependability that includes automatic routing around network failures. It's also simple and quick to add new locations as you need to. With Frame Relay, you get proven, high-quality connectivity for email, file transfer, database access, order processing, inventory control and image transfer.

Bell's Frame Relay can connect low speed Local Area Networks (LANs) to high speed LANs, with speeds that range from 56 Kbps to 45 Mbps. Capacity is easily adjusted between existing locations so you can configure the network to your exact specifications. And our Frame Relay is fully scalable to meet the evolving needs of your business.

Choose Bell Frame Relay for easy, customized service

Bell makes Frame Relay easy. We have over 1,500 points of presence nationally, including comprehensive presence in Alberta and British Columbia, and access alliances in the U.S. Bell Frame Relay requires minimized capital investment from you, so you receive high data throughput and greater network flexibility in a solution that saves you money. And as a completely managed service, you can leave your network design and diagnostic tools in the hands of Bell experts.

Bell's Frame Relay features make it possible for you to extend your communications, reduce operating expenses and improve application performance so you can simply get down to growing your business.

Bell Frame Relay features

Network Tailoring ensures your network is uniquely designed to make the most of your business opportunities and meet your connectivity requirements right from the start.

Integrated Solutions provide options and recommendations that can save you money by consolidating multiple traffic types onto a single service.

Service Options from Economy to Priority allow you to configure a network that fits your budget and gives you the level of service you require.

PVC-Committed Information Rate guarantees your throughput levels on a per-customer basis to ensure your service expectations and network requirements are consistently met.

Bell Frame Relay makes service simple

It's easy to do business with Bell. We make it simple by offering a flat rate charge, with a single, national point of contact for technical support. Most of the Frame Relay features are free of charge with the service. Bell Frame Relay provides a solid base for adding other value added and managed services. And you'll receive performance management reports to track exactly how the service is working for your business. With Bell, your connectivity is supported by the most extensive, 100% digital, high-capacity, optical network in Canada. Our superior network performance, backed by 3,000 network engineers, technicians and support professionals, protects and enhances your critical business functions while giving you maximum reliability and uptime. And as a full-service solution, Bell's Frame Relay provides round-the-clock monitoring so we're there when you need us.

**The ability to link multiple sites. Maintain high standards. And save money.
That's simply good business.**
