

Bell Business Internet Dedicated

A simple way to keep your business online all the time

At Bell, we understand how important it is to be able to depend on your Internet connection. Especially when you rely on the Internet to do business. That's what **Bell Business Internet Dedicated** is all about. Fully managed, dedicated Internet access that is always available to you.

With Bell Business Internet Dedicated, you benefit from a permanent connection from your Local Area Network (LAN) to the Internet. To put it simply, you'll never again have to contend with external Internet users for access. With connection options that range from 128 Kbps to 155 Mbps, Business Internet Dedicated solutions can be tailored to the needs of your business. You simply have to choose the option that best suits your requirements.

Bell Business Internet Dedicated is a great place to start building your business connectivity. You receive the reliable access you need today, while building a foundation for expanded network activity as your business grows and evolves. And with managed customer premise equipment, you benefit from increased service assurance and are protected from technology obsolescence.

Choose Bell Business Internet Dedicated for easy, customized service

Bell makes Internet access easy. With usage billing that ensures you only pay for what you actually use, and online utilization and service quality reporting, you benefit from efficient, cost effective services that are easy to keep on top of.

Bell's Business Internet Dedicated features make it possible for you to enhance productivity, or reach new markets, with a solution that fits your needs for speed, bandwidth and number of workstations.

Bell Business Internet Dedicated features

32 Static IP Addresses make hosting mail, web and file transfer protocol servers easier, providing fast, always on and simple to use access for your employees and customers.

Domain Name Registration on primary and secondary domain name system servers ensures your customers can find you quickly and easily.

Router Hardware provided, installed, configured, monitored and maintained by Bell allows you to focus on what Internet connectivity can do for your business, instead of how it works.

Content Options include free news feed through a usenet news service so you can keep in the loop on issues that affect you and your business.

Bell Business Internet Dedicated access options

ISDN is perfect for small LANs of up to 10 workstations, offers speeds of 128 Kbps and enables web browsing, email and newsgroups.

ADSL offers a low cost 15 GB throughput with speeds up to 3 Mbps, for medium LANs of up to 30 workstations.

ADSL Plus increases your throughput to 100GB while maintaining speeds up to 3 Mbps for medium LANs of up to 30 workstations.

T1 delivers rapid, reliable connectivity for small to medium LANs with 10 to 30 workstations, support for hosting, Virtual Private Network (VPN) and e-commerce, with speeds of 256 Kbps to 3 Mbps.

10 Mbps offers flat rate service that allows for flexibility with committed access from 2 Mbps to 10 Mbps, and provides dedicated, non-shared connections for LANs of 20 to 60+ workstations.

10 Mbps Burstable delivers flexibility to medium and large LANs with 30 to 60+ workstations through 'bursting' capability that provides up to 10 Mbps access to your chosen sustainable speed of either 2, 3, 4, 5 or 7 Mbps.

100 Mbps Burstable is an ethernet solution that offers high speed, scalable and cost effective Internet bandwidth with tiered sustainable speeds of 10, 20, 30 and 40 Mbps that are 'burstable' to 100 Mbps. Perfect for businesses that have outgrown their 10 Mbps service but aren't quite ready for ATM.

DS3 provides reserved bandwidth and robust performance at 45 Mbps for those who need to support web hosting, e-commerce, VPN or large multimedia transmissions.

ATM (Asynchronous Transfer Mode) is the ultimate connection for larger LANs of 30 to 100+ workstations as it supports web hosting, e-commerce, VPN and large multimedia transmissions over a private virtual circuit at speeds of 3 Mbps to 155 Mbps.

Bell Business Internet Dedicated simplifies connectivity

It's easy to do business with Bell. We make it simple by offering volume or speed based usage billing and reporting that keeps track of both the quality of our service and the amount you use it. Most of the Business Internet Dedicated features are free of charge with the service. And Bell takes care of your router hardware to ensure you stay connected. Bell Business Internet Dedicated has 40 points of presence across Canada, and worldwide alliances to maintain seamless service, wherever business takes you. With Bell, your connectivity is supported by the most extensive, 100% digital, high-capacity, optical network in Canada. Our superior network performance, backed by 3,000 network engineers, technicians and support professionals, protects and enhances your critical business functions while giving you maximum reliability and uptime. And as a total solution provider, we provide round-the-clock monitoring and superior customer service.

**The power of Internet connectivity. Tailored to your needs. Always available.
That's simply good business.**
