

Bell Business Internet High Speed Enterprise

A simple way to improve competitive performance

At Bell, we understand how important it is to simplify things for your employees, including those who are remote and mobile. To provide them with an easy, reliable way of connecting to the Internet. That's what **Bell Business Internet High Speed Enterprise** is all about. Increasing accessibility so you can explore the possibilities of the Internet.

With Bell Business Internet High Speed Enterprise, you benefit from faster downloads, speedy surfing and large bandwidth. Imagine the efficiencies of a team that can share files instantly instead of waiting for lengthy data transmissions. The ability to research multiple websites in less time than it took to explore just one. And the advantages of meeting with business partners through Internet-based video and audio conferencing instead of incurring travel expenses. With Business Internet High Speed Enterprise, your employees are connected through 24 hours a day, seven days a week Internet access that doesn't tie up a phone line.

Bell's Business Internet High Speed Enterprise is a Digital Subscriber Line (DSL) service. This allows you to keep in touch with your team, or set-up Internet based kiosks in public locations. You'll be able to use the Internet to enhance communications between your employees, and build relationships with your customers.

Choose Bell Business Internet High Speed Enterprise for easy, always on service

Bell makes business Internet easy. With DSL technology, single station connectivity and Bell's IP VPN (Virtual Private Network) secure Remote Access Service, your high-speed Internet connection will make your business more efficient while maintaining cost effectiveness.

Bell's Business Internet High Speed Enterprise features make it possible for you to enhance productivity, reduce operating expenses and take advantage of all that the Internet has to offer your business.

Bell Business Internet High Speed Enterprise features

1.5 Mbps / 320 Service enables you to download files from the Internet up to fifty times faster than with a dial modem, and benefit from increased upload speeds.

Always On, Single Station Access gives you continuous Internet access without having to purchase a second line.

Global Roaming allows you to keep in touch from over 150 countries around the world.

Remote Dial Access allows you to check in when you're away from the office, with up to twenty hours of free dial-up access.

Web-based Email Access makes the most of your time and keeps you informed by allowing you to check email* from an Internet connection at home or on the road.

Unlimited Data Transfer allows you to make the most of your Internet connection without having to worry about exceeding any usage limits.

Optional IP VPN Remote Access Service ensures security for remote access to your corporate network.

Toll-free Business Class Help Desk provides peace of mind that your questions can be answered 24 hours a day, seven days a week.

Bell Business Internet High Speed Enterprise makes improved performance simple

It's easy to do business with Bell. We make it simple by offering consolidated billing for all your employees, and a special customer care portal so you can manage your own user base. Most of the Bell Business Internet High Speed Enterprise features are free of charge with your service. No special equipment is required – your modem is included with your business Internet package. Your connection is always on, and for remote usage you receive up to twenty hours of free dial-up access. With Bell, your connectivity is supported by the most extensive, 100% digital, high-capacity, optical network in Canada. Our superior network performance, backed by 3,000 network engineers, technicians and support professionals, protects and enhances your critical business functions while giving you maximum reliability and uptime.
