COMMUNICATIONS SYSTEMS FOR SMALL, MEDIUM AND LARGE BUSINESSES

## Compact, yet powerful

Whether small, medium-sized, or large, your business can benefit from the power, flexibility, and intelligence of Norstar communications systems. Three Norstar products – all built with the latest technology and designed to easily expand as your company grows – all with the kind of power previously found only in big business environments:

- Norstar's 3x8 Key System – designed for small business, is a cost-effective solution that can expand to three lines and eight extensions, and comes with a wide range of features to manage communications and improve customer service
- Norstar's Compact-ICS – designed to meet your current needs, yet easily accommodates future growth, starting at four lines and eight extensions, and growing to sixteen lines and twenty-four stations, when ISDN BRI is applied
- Norstar's Modular-ICS – for businesses that use more than twenty phones, and anticipate the need for more power, more growth, and more advanced applications. The system can start as small as four lines and thirty-two extensions, and can grow to 272 ports. It can support analog or digital lines, including ISDN BRI and PRI for high-speed voice and data applications, and Companion Wireless for full roaming capability.

**The term 'reliability' applies to both the Norstar product line and the company that brings them to you:**

- Norstar products come with a one-year guarantee
- Norstar applications are designed to work with Norstar business communications systems to provide messaging, call centre management, and desktop integration for applications like fax and email
- Bell Intrigna offers you the full suite of Norstar products, along with professional installation, consulting, and support services — whether you need your communication requirements analyzed, or a solution engineered to suit your application, installation, or training needs, Bell Intrigna's Service Advisors, and Technicians offer customized implementation and training services to ensure your satisfaction
- Once your Norstar product is in place, Bell Intrigna supplies help-desk support seven days a week, twenty-four hours a day.
